CHURCH NOTICES AND ACTIVITIES

UNITED CHURCH NOTES

The Services next Sunday will be at
Ross at 11 A. M.
Alma Mater at 2 P.M.
Roseberry at 3.30 P.M.
Irma at 7.30 P.M.

The topic will be "The Fourth Commandment or the Day of Rest."
Note that for the winter months the services in Irma will be at 7.30 in the evening commencing with Sunday, October 6th.

Plans are being made for a series of special services commencing with Sunday, November 3rd. This Evangelistic Mission will be conducted by Rev. Mr. Wood of Toronto who is engaged by the Department of Evangelism and Social Service of the United Church of Canada. We are looking forward to a deepening of the spiritual life of the Church and to a quickening of interest in religious life.

At the Rally Day Service in the Sunday School last Sunday a new departure was made in order to encourage regular attendance. Buttons were given to each scholar with the idea of encouraging 100 per cent. attendance. This attendance will be recognised every quarter by the gift of a special button, and at the end of the year by the gift of a gold button. In order to give all a fair opportunity, the scholars must begin their attendance next Sunday if they wish to win a button.

Mr. and Mrs. Ewing of Drumheller visited Rev. and Mrs. J. R. Geeson last Sunday on their way to Lloydminster and Lashburn.

The Ladies Aid will meet at the home of Mrs. Frank Peterson on October 10th. Everyone come and make this a real business meeting. The committee in charge of the Bazaar asks that the members will bring their donations to the fancy work so they will know what more to buy and make up.

Annual Bazaar of the United Church will be held in the Church on November 2nd. Bigger and better than ever.

ANGLICAN CHURCH

His Lordship the Bishop of Edmonton is visiting: Wainwright Sunday, October 27th and probably will visit Irma on that date so please watch for future announcements.

The next W. A. meeting will be held at the home of Mrs. Inkens on Tuesday, October 8th. Everybody welcome.

Grade V.—Sarah Fitzpatrick 73.25, Grade IV.—Hubert Feyer 88.85.

Grade III.—Arthur Feyer 92.14, William Steele 71.43, Eric Steele 68.28

Grade I.—Gordon Fitzpatrick, first, Stella Steele, second, Aulida Fitzpatrick, third.

A. G. Miles, Teacher.

SALE & REDEMPTION OF IMPOUNDED ANIMALS (Sec. 48)

Notice is hereby given under Section 48 of The Domestic Animals Act (Municipalities) that One Black Gelding, no visible brand, and One Bay Gelding, no visible brand, was impounded in the pound kept by Joe Gulbraa located on the S. W. 16-45-9 with on Thursday the 12th day of September A.D. 1929 and that the said animal was sold on the 25th day of September, 1929 to O. B. Venjerud of Irma and that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animals.

For information apply to the undersigned.
—R. J. TATE, Sec.-Treas. of the Municipality of Battle River No. 423 Post Office Irma, Alta.

If you have something valuable that you don't want and somebody else will use it, an ad. in this paper will sell it for you. Try it.

NEWS ITEMS FROM KINSALLA

Mr. Harvey-Dennison is still in the Lamont hospital and reports are to the effect that he is slowly improving. Mr. Dennison suffered a stroke of paralysis, supposedly caused from bad teeth. We hope for his early recovery to good health.

A farewell party was given at the home of Mr. and Mrs. Wm. Kerns, in honor of the Misses Dora Eckelt and Muriel Clarke who are leaving shortly for Edmonton to enter the Royal Alexandra hospital as nurses-in-training.

K. Ronjom, K. Vehus, O. Ronjom, K. Moen, and Martin Swingen have taken a contract to brush and clear forty acres for Rasmus Bergsht, of Lougheed.

Ward Mathews, Arthur Yakes and Miss Marion Mathews left this week by train for California.

Born to Mr. and Mrs. Joe Harding on Friday, September 27th—a baby boy.

A serious shortage of potatoes is reported in all parts of the district. There is not a good yield anywhere, and most of the growers are only harvesting from one to three bags. Some of the local merchants have been getting a line-up on the amount required by the various householders, with a view to having a carload shipped in from outside points. It is understood that the least they can be procured at is \$1.25 per bushel, and the freight will amount to about 25c per bushel a total of \$1.50 at station here.

Lewis Overbo has reported the selling of eight Maytag Aluminum washing machines in the Wetaskiwin district the past month. Lewis is being transferred to Leduc to sell there for the month of October.

Mrs. Waltz took critically ill on her way home from town one day last week. She was rushed back to town by Mrs. Sculthorpe and taken by auto by Mrs. E. C. Williams to the Viking hospital. Mrs. Waltz has not been well for some time, but hopes are held out for her early recovery to good health.

Auction sales for some reason have been very scarce so far this fall. Up to the present there only one sale advertised to take place near Jarow on October 2nd.

Mrs. Scott returned from Edmonton on Saturday where she had been for the past week.

Miss K. Ferries spent the week end at her home here.

The W. I. met at the home of Mrs. Lee on Saturday afternoon, there was a good attendance. They intend putting on a Whist Drive some time soon.

Mrs. Ross McFarland and son Murray and Mrs. R. Whyte and daughter Lovelle of Irma took dinner with Mr. and Mrs. R. Eaton last Wednesday.

Mr. and Mrs. Nelson Malloy and family of Macklin spent the week end with Mr. and Mrs. Ferries.

Mrs. Ferries mother of Macklin-Sask., is spending the week with Mr. and Mrs. Jack Neale and family motored to Vermilion on Sunday and spent the day with her parents.

Mrs. Neale and children remained for the week. Mr. Neale returned home Sunday evening.

The Ladies Aid will meet in the basement of the church on Thursday afternoon at 3 p.m. October 10th.

Mr. J. Beschell spent a few days in Edmonton last week.

Mr. and Mrs. Carl Smogard spent a few days in Edmonton the past week.

Mr. and Mrs. E. Mark and Mr. and Mrs. H. Austin spent last Thursday in Wainwright.

Mr. J. Ansell of Wainwright spent Sunday at his home here.

NOTICE TO THRESHHERMEN

Owners or operators of threshing machines and combined harvesters are required to have their machines registered with the Department of Agriculture and to send the Department at the end of the threshing season a return showing the number of acres and number of bushels threshed. This applies whether the machine is to be used for custom work or only for the owner's crop.

Special forms for return may be secured from the Publicity Branch Department of Agriculture, Edmonton.

INTEREST KEEN IN BOXING BOUT

(From Viking News)

Preparations for the big boxing program to be held in the new Viking Elks Community Hall on Wednesday evening, October 16th, under the auspices of the Elks Lodge, are well under way. Posters are now out announcing the event. The main go is between Curly Kid Archibald, the sweat king of Irma and district, and Dave Dorwood, the pride and undefeated boxer from Innisfree. On two previous occasions, these boys have been matched to appear here, but owing to unforeseen circumstances, had to be postponed.

However, it is a go this time, and the boys are in active training and will be in tip-top shape when the gong rings.

The local boxing committee are arranging some good preliminaries and attractions that will add to the pleasure of the occasion.

Popular prices prevail: \$1.50 For ringside seats; \$1.00 general admission, tax extra.

Both principals in the main event have a large following and it is expected that the new hall will be taxed to capacity to see this the first of a series of boxing programs that the Elks intend to stage from time to time.

This is the bout you have been waiting for. Let's go!

NEWS ITEMS FROM JARROW

On Friday evening the young people of the town gave a farewell party to Marion and Ward Matthews and Arthur Yokes who left for California this week. It was given at the home of Mrs. Marbury, about twenty of the young people were present. The evening was spent in games, music and dancing. A midnight supper was served and after wishing the three a good trip and good luck the crowd dispersed.

The entertainment committee of the community club met at the home of Mr. and Mrs. Lutton on Tuesday, when plans were made to have a real good dance on October 4th. Also a good meeting on October 7th which is the annual meeting of the Club. Reports will be read and a full account of the activities of the Club for the past year will be given, also a full financial statement. All members, old and new are requested to be present.

The Ladies Aid will meet at the home of Mrs. Arnold Christensen on Tuesday afternoon of next week, instead of Wednesday which is the regular day.

Mr. Henderson who moved here last fall is having a sale on Wednesday afternoon and we believe intends to leave this district. We are sorry to see Mr. and Mrs. Henderson and family go but wish them every success in their new home.

Mr. Nate Bell of Innisfree, and Miss Helen Halstead of Wainwright spent Sunday with the former's sister, Mrs. N. Lutton.

Mr. and Mrs. Sisson motored to Edmonton on Thursday, where Mr. Sisson is having his teeth attended to.

Mr. Harvey Dennison is still very ill in Lamont hospital.

Mrs. Lockhart was able to come home from the Viking hospital last week but is still quite ill. Her daughter, Miss McNeel of Hayter is staying with her.

On Sunday Mrs. Hyslop of Viking preached in the United Church. A good attendance enjoyed her talk.

MAKING A CHOICE

The shopper of today has a wonderful range of goods from which to choose a purchase. Stores carry a great variety of styles, colors, fabrics, and materials—good for every taste and for every purpose.

The well informed shopper keeps posted on new and better materials, on trend of style, on new devices and new mechanical improvements. The shopper does this by reading the advertisements in the newspapers. Shopping is thus greatly simplified by a fund of information which assists the shopper in spending his money to the best advantage.

The Wastebasket

Heard in a Bruce restaurant: Waiter: "Has your order been taken?" Patron: "Yes, and so was my photograph when I was a child."

"Don't you think it's about time the baby learned to say papa?" remarked a proud young father here the other day to his wife. "Oh, no," she replied, "I hadn't intended telling him who you are until he becomes a little stronger."

Heard at the dance: "Are those girls nice?" "I'll say they are! Why they are so nice that it is said that when they dream of an auto ride they walk in their sleep."

"Hi, there! What are you doing with those spoons in your pocket?" said a waiter in a Wainwright restaurant to a customer. "Following doctor's orders," the customer replied. "Doctor's orders? How do you mean, sir?" asked the waiter. "He told me to take two teaspoons after each meal," was the reply.

"Did you go to Sunday School when you were a boy?" asked a son of his father. "Yes, son, regularly. I never missed a Sunday," replied his father. "Well, I'll bet it won't do me any good, either," the boy replied. "Have you ordered anything, sir?" asked a waiter in a Camrose restaurant of a patron. "Well, I asked for Christmas pudding," the man replied. "But it was so long ago, you'd better bring me a hot cross bun."

"You haven't smoked any of the cigars that I gave you for Christmas," remarked a local lady of her husband. "No, I'm keeping them for Willie when he wants to learn to smoke," he replied.

Heard at the ladies social: "Do you think that a married woman should work for a living?" "Sure, I don't see why she should go hungry just because she's got a husband."

"Who gave the bride away?" a Jarrow lady asked of a young fellow who had just returned from attending a wedding at Kinsella recently. "No body," he replied, "I could have done it, but I figured it was best to let him find out for himself."

Something to worry about—An orthopedic expert declares that women's feet average two sizes larger than they were twenty years ago. No wonder, trying to fill men's shoes.

Explicit Street-Car Instructions This is what an Irish conductor called over the heads of the strap hangers at the rush hour the other night in Dublin.

"Will him in front place move up so that thim behind c'n take the places of thim in front an' leave room fer thim that's nather in front nor behind."

An old timer says that he can remember the time when if a fellow gave a friend a pair of garters for Christmas he was quite certain he would never see them again.

An incident is reported at last of a woman who passed right by a mirror without glancing in it. (She was looking straight ahead at the larger one in front of her.)

HUDSON BAY RAILWAY NEARING COMPLETION

The following statement has been issued from the headquarters of the Canadian National Railways: "A good deal of interest has naturally been awakened in Canada and particularly in the west, as to when the Hudson Bay Railway will commence to function commercially. The construction of the railway, which is under the direction of the Canadian National Railways, is being pushed as rapidly as possible, but it would seriously interfere with the completion of the railway and also give it a bad name if it were opened for traffic prematurely or until such traffic can be handled with reasonable efficiency and satisfaction. Consequently it is hoped that those who have the welfare of the Hudson Bay Railway at heart will understand the situation and realize that, although nothing is being left undone to expedite completion, construction must be further advanced before commercial operation begins."

APPLICATION FOR LEASE OF ROAD ALLOWANCE OR SURVEYED HIGHWAY

Notice is hereby given that G. W. Mitchell of Irma has made application to the Minister of Public Works, Edmonton, for a lease of the following road allowance or surveyed highway, viz: Between Sections 11 and 12-45-9 With at point of division. Any protest against the granting of the above mentioned lease must be forwarded to the Minister of Public Works, Edmonton, within thirty days from the date of this notice. Dated at Irma, Sept. 10th, 1929. G. W. Mitchell, Applicant.

J. R. LOVE TO HOLD MEETINGS

Battleview—Saturday, Oct. 5th at 2 p.m.
Albert—Saturday, Oct. 5th at 8 p.m.

PUBLIC MEETINGS

Arrangements have been made for Henry E. Spencer, M. P. to address meetings at the following places to discuss Federal Affairs:
At Killarney, Oct. 9th at 8 p.m.
At Lealholm, Oct. 10th at 8 p.m.
At Roros, Oct. 11th, at 8 p.m.
At Prospect Valley, Oct. 12, 8 p.m.
At Sligo, Oct. 14th, at 8 p.m.
At Greenshields, Oct. 15th, at 8 p.m.
At Gilt Edge, Oct. 16th, at 8 p.m.
At Battle View, Oct. 17th, at 8 p.m.
At Irma, Oct. 18th, at 8 p.m.
A cordial invitation is extended to all interested in Dominion Problems. —The Executive Battle River U.F. A. Association.

"GOLD NUGGET"

C. W. Payne was in town on Tuesday and learned there was a rumor afloat to the effect that he had found a gold nugget on his ranch on the Paint Earth creek. On being questioned he admitted having found one—this is his story. He discovered this nugget nearly three years ago lying in the grass near the creek but didn't think much of it at the time and left it there. During last summer, however, he hunted it up and brought it into town and handed it to John C. Anderson, who took it to Edmonton where he sold it for one hundred and three dollars, said nugget being a nice sleek black muley heifer, and that he finds that the surest way of getting gold along the Paint Earth. —Alliance Times.

By a recent purchase, George M. Bell, of Calgary, now controls the Vancouver Sun, The Calgary Alberta, The Western Farmer, and the Northern Mail, published at The Pas, Manitoba. The publishing company will be known as the Interprovincial Newspapers Limited. By the amalgamation and ownership in the west, the western viewpoint will predominate, and this in itself is an asset which will prove beneficial in all movements that are needed in the steady development of the western provinces now more than ever.

'Fresh from the gardens'

Removal Of Friction and Strife

The setting up of the organization of the League of Nations had as its main object, the removal of those racial, religious, economic and political animosities and suspicions which kept the nations of the world, and particularly the nations of Europe, in constant turmoil and ever on the verge of war. Because of the bitterness and suspicions thus kept alive and active, all nations armed to the teeth, one against another, while a multitude of restrictions and prohibitions to international intercourse were established.

Not only were national boundaries marked by lines of fortifications, but intricate systems of espionage were maintained, passports were required of people passing across boundary lines, different gauges were built by railways, customs posts established everywhere, and hostile tariffs imposed by one country upon the products of other countries.

Thus were the people of each country kept warned against the possible enmity of other countries, suspicions were never allowed to die down, a constant state of friction prevailed, and strife was uppermost in every mind.

It was as inevitable as the rising of the sun that such a state of mind among the peoples of the world must end in some gigantic conflict. It came in 1914, and all but ruined mankind, and nearly destroyed civilization. The statement of the world realized that unless something was done to remove these suspicions and causes of friction, it would be only a matter of time until another and still more colossal struggle would take place.

When it became operative, the League of Nations further realized that, if disarmament was to be brought about, armies and navies reduced, and the huge drain on mankind for warlike purposes ended, the real causes of war must be removed, suspicions lulled, and a true understanding developed among all people. In other words, that a proper spirit of international goodwill must replace the existing narrow and blatant nationalism rampant everywhere.

The League, therefore, set up the International Labor Office, with the object of improving the lot of workers in all countries; and to raise the standard of living of the masses of the people everywhere, realizing that, if people are contented and happy, and living under a fairly high standard, they will not be suspicious or jealous of others, nor quite so ready to plunge into war to better their own condition.

In like manner, the League has devoted its attention to many causes of sorrow and unrest in the world, and it is persistently seeking improvement in all departments of the world's work and methods of living.

It is, because of many really great achievements in these directions, coupled with the horrors of the last war, that the minds of all people are today more open to receive and support plans for disarmament, and that, with the passing of the years, the prospects for permanent world peace become brighter.

World statesmen are now convinced that the greatest danger to the world peace is to be found in the realm of economics. In the rivalries of nations in the field of trade and commerce. This is the age of big business, the age of mechanization, mass production, and of endeavor to sell the surplus products of one nation in the markets of other nations. While this has been more or less true of all ages, and wars have been waged in order to seize territory with a view to later commercial exploitation or development, today the urge to secure new and larger markets is the strongest ally of those who clamor for large armies and huge navies.

President Briand's proposal for a United States of Europe is economic, rather than political. We venture to say it is not aimed at Great Britain, or the United States of America, but is designed to remove the multitude of restrictions which prevail all over Europe, isolating one nation from another, and doing economic hurt to all of them.

So, too, the Franco-British proposal for a two-year tariff holiday during which all nations would agree not to raise their tariffs, and meanwhile participate in a sincere international conference to determine ways and means whereby, without sacrificing the interests of any one country, a larger measure of freedom in trade and commerce, and intercourse generally, could be devised.

The world is coming to realize and fully understand that trade barriers are now the most prolific cause of misunderstanding between nations, and the cause of more friction and heart-burning than anything else. Even Canada and the United States, which live side by side in such mutual understanding and goodwill, are more frequently disturbed over tariffs than any other one thing, or all other things put together.

The ideal condition of world free trade may be an impossible dream for some generations to come, but surely much of the present friction can be removed, and the world begin to trace the path that leads to the ultimately desired goal.

Accelerated Schedules Feature C.P.R. Fall, Winter Time Table

New Schedules To Be In Effect
Sunday, September 29th

The fall and winter time table of the Canadian Pacific Railway which will go into effect over the system on the last Sunday of September, features many important changes in passenger train service, among

which is the speeding up of transcontinental trains, saving the coast traveller a matter of ten hours. These improved schedules are in line with the Company's policy of keeping abreast of the times and providing the best possible service to its patrons. The Company's ticket agents are now in possession of complete information, which is available to the public upon application.

Sheep Ranching Expanding

Industry Is Showing Promising
Development In British
Columbia

The sheep industry from a ranching point of view shows signs of development in Western Canada, particularly in British Columbia, states the Department of Agriculture. Last fall upwards of 10,000 head of ewe stock were bought in Alberta and shipped to the interior points of British Columbia. In 1928, the demand for range ewes exceeded the supply and the demand promises to be equally as good this year.

Visitors to the home of Charles Darwin, in Kent, England, may now see the chair and writing board at which Darwin worked while writing his famous theory of evolution.

The chrysanthemum was introduced into England from China about 1790.

W. N. U. 1804

A Real Necessity

"Don't Get Excited" Club Would Be
a Boon To World

There are clubs and societies for every conceivable purpose under the sun, yet one of the most obvious needs of Americans today is left entirely uncovered. What we need is a don't get excited club whose object shall be to keep people from coming to the boiling point when it isn't necessary.

The trouble with most of us is we get too excited over little things and not excited enough over the big ones. Agitation, loss of temper and surrender of self-command under the trivial annoyances of life are a sheer waste of time and energy. In most human affairs more can be accomplished through poise and placidity than through effervescence and seismic phenomena.

If a don't-get-excited club could be so organized as to conserve all the human voltage that now goes to waste through needless excitement it would mean that mankind had reached the suburbs of a new era.

RHEUMATIC PEOPLE CAN OBTAIN RELIEF

By Enriching Their Blood With
Dr. Williams' Pink Pills

Rheumatism is a disorder of the blood. It attacks people when the blood is thin and impure, thus setting up inflammation of the muscles and joints. Wet or cold weather may start the pains of rheumatism, but it is not the cause. The cause is in the blood. Hot applications or rubbing with liniments may ease the pain, but do not reach the cause and the pains are soon back again. To get rid of this most painful trouble you must treat it through the blood and for nothing else can

equal Dr. Williams' Pink Pills which from first does to last actually make new, rich blood, thus driving the rheumatic poisons from the system. Mr. Henry E. Amiro, Lower East Public, N.Y., tells what these pills did for him. He says: "I had an attack of acute rheumatism so bad that I could not walk a hundred yards without so much suffering that I would feel faint. I could not do the least work and any movement caused great pain. I was under the care of a doctor but did not improve much. Then reading of a similar case in a newspaper I decided to try Dr. Williams' Pink Pills. By the time I had used three boxes, there was no doubt they were helping me. I took altogether about a dozen boxes when I was entirely relieved of the trouble, able to walk four miles to my work, chop wood all day and then walk home again. To anyone suffering from rheumatism I can strongly recommend Dr. Williams' Pink Pills. You can get these pills through any medicine dealer or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont."

Greatest Wheat Exporters

Canada Stands At Top Of The List
As Exporter Of Wheat

Canada stood first as an exporter of wheat during the 1927-28 crop year, with exports of 255,062,278 bushels. The United States came second with exports of 168,307,000; Argentina, third with 155,238,000 and Australia fourth, with 80,950,000 bushels. The report of the Bureau of Statistics also shows that for 1927-28 the world's wheat production was 4,815,400,000 bushels, of which Canada produced 476,985,000 bushels ranking third with Russia in the first place and the United States in the second.

When Asthma Comes do not despair. Turn at once to the help effective—Dr. J. D. Kellogg's Asthma Remedy. This wonderful remedy will give you the aid you need so sorely. Choking ceases, breathing becomes natural and without effort. Others, thousands of them, have suffered as you suffer but have wisely turned to this famous remedy and ceased to suffer. Get a package this very day.

Bananas are banned in Italy because they do not grow in that country or in any of its colonies. This is protection carried out to the limit.

Worms in children, if they be not attended to, cause convulsions, and often death. Mother's Own Worm Exterminator will protect the children from these distressing afflictions.

People in the United States use up more than a million lead pencils each year.

Mystery Of Steel Hardening

Steel Now Produced That Is Harder
and More Ductile Than
Damascus

Mystery and secrecy that for centuries shed romance over the art of steel hardening in America, has almost entirely disappeared, according to W. H. Eisman, secretary of the American Society for Steel Treating.

The famous blades of Damascus, tempered, as legends by being run through the body of a slave, hold no secrets for modern swordsmiths. Steel is produced now that is harder than Damascus and possibly more ductile.

Dr. W. S. Carnes, a metallurgist, of Canton, Ohio, has produced a sword with which he can shave, and yet so ductile that he can wind it several times around his arm. It is of carbon vanadium steel. As recently as 10 years ago some of the processes of hardening steel were carried on in gloomy and secluded basements. The officiating smith even wore a high silk hat, muttered abracadabras and made passes over the treating tank.

Potatoes played an important role. Half a spud was set about on the water. Where the potato came to rest was the best place to plunge the white-hot steel. During the war, a great stir was made when a group of steel treaters in Poughkeepsie, N.Y., could not obtain water from Sheffield, England. They thought this had given Sheffield steel its quality which steel treaters the world over had tried to imitate.

Today the process of steel hardening has become automatic with colored lights flashing the instant steel assumes the proper hardness.

A Corrector Of Pulmonary Troubles.—Many testimonials could be presented showing the great efficacy of Dr. Thomas' Electric Oil in correcting disorders of the respiratory processes, but the best testimonial is experience and best is recommended to all who suffer from these disorders with the certainty that they will find relief. It will allay inflammation in the bronchial tubes.

Had Been There

"Travelled" said a sailor in a train to a passenger who had questioned him. "I should think I have. I've been all round the world; over an' under it, too. There ain't many ports I don't know the inside of."

"Why, you must know a lot about geography."

"Yes, we did put 'in there once, much of a place, what I remember it."

Increase In Water Power

The mid-year review of water power progress issued by Hon. Charles Stewart, Minister of the Interior, shows almost 200,000 h.p. added to the Dominion's total within the half year.

Many have been relieved of corns by Holloway's Corn Remover. It has a power of its own that will be found effective.

Will Establish Sanatorium

The government of Manitoba has decided to devote the \$250,000 voted at the last legislature, to establishing a sanatorium for tuberculosis children in Winnipeg.

Stop Colds, with Minard's Liniment.

Daring Stunt Flyers

"Four Musketeers Of The Air" Defy
Death At Camp Borden

"Four Musketeers of the Air" is the title accorded a small group of Canadian aviators who are rapidly demonstrating to the world that while Canada's air force may not be the largest, it is very nearly, if not the best, at its own particular game.

The Musketeers are Squadron Leader C. McEwen, M.C., Flight Lieut. David A. Harding, famous rugby player, Pilot Officer E. McNab and Pilot Officer E. A. McGowan, all four being stationed at Camp Borden, and flying the Canadian army's Siskin pursuit planes.

At various exhibitions both here and in the United States, the Musketeers have thrilled thousands with their antics. At Cleveland, Ohio, recently, they stole the thunder from many more famous fliers who had performed there, and their performances were regarded as one of the most remarkable ever seen in the United States.

Camp Borden features individual stunting at the finishing part of a novice flyer's education. It is a means of obtaining perfection in the control of an aeroplane, and while formation flying is also taught and practiced, the individual practice of putting an aeroplane through its paces is more strongly endorsed.

One of the Musketeers' favorite stunts is a very spectacular one. The planes, starting in formation at about 3,000 feet, suddenly nose down. At terrific speed, with motors wide open, they spread out, fan-shaped, and suddenly zoom up. At the peak of the climb, the planes gradually fall over backwards and fly for some distance upside-down.

Postal Revenue

Now On A Level With What It Was
Three Years Ago With Letter
Rate Was 3 Cents

Postal revenue is now on a level with what it was three years ago, despite the return to the 2 cent letter rate (in Canada, the United States and Mexico) in 1926, and that within the Empire on Christmas day, 1928. For the fiscal year ended March 31st, 1928, the revenue was \$31,025,000, and for the fiscal year ended March last, \$31,170,000.

A census is to be taken in more than 200 countries and colonies next year.

Rubber can be obtained from more than 300 varieties of tropical trees.

All These Advantages For Farm Construction

For both old and new construction Gyproc gives more advantages than any other material. Makes durable, permanent walls and ceilings in less time and at less cost. Cannot warp, crack, shrink or burn, and is ideal for lining houses, garages, poultry houses, barns, grain bins and all other farm buildings.

FARMER'S WIFE GETS STRENGTH

By Taking Lydia E. Pinkham's Vegetable Compound

Wilton, Ont.—"I am taking Lydia E. Pinkham's Vegetable Compound through the change of life. It helps me and I cannot praise it too highly. I was troubled with heat flashes and my limbs were heavy so I could hardly walk to do my farm work. I saw in the newspaper your ad about the Vegetable Compound and thought to give it a trial. The first bottle gave me relief and I have told others what it did for me. I am willing for you to use my letter if you choose."—Miss D. B. Petrus, Wilton, Ontario.

Migration of British Juveniles For Farms in Canada is One of Promising Features of Immigration

The migration of British juveniles for farms in Canada, is one of the most promising features of the immigration situation at the present time," stated R. M. Pym, superintendent in Britain of juvenile immigration for the Colonization Department of the Canadian National Railways, who arrived in Montreal on the White Star liner, "Laurentic," for the annual conference of National Railways Colonization department officials.

Mr. Pym arrived with the final party of British juveniles for the season, numbering some 83 boys, and commenting on the amazing development of juvenile immigration from the British Isles, Mr. Pym stated that altogether this season a total of 1,180 boys had been brought out under the auspices of the Canadian National Railways. This was an increase of 134 per cent. over the season of 1928, and when it was considered that 1928 season showed an increase of 84 per cent. over 1927, it could be realized that a great extent juvenile immigration had become a factor in the general situation.

More than 1,000 or the boys coming forward this year were placed by the British Immigration and Colonization Association, of Montreal, on farms throughout Ontario. The balance have been placed by other organizations in both eastern and western Canada. "About 97 per cent. of these boys have definitely made good," said Mr. Pym. "Something like one half per cent. have had to be deported, while the remaining small percentage might be said to be still on the fence, with respect to their desire to stay in this country."

Generally speaking, the boys come from good middleclass families and many of them are fairly well educated, bright and enterprising and eager to make a career for themselves in the new country.

"One of our greatest difficulties, in juvenile immigration work," said Mr. Pym, "has been the prevalence of the old idea, still persisting in the Old Country, that boys and young men were sent to colonies only as a last resort, if they were wayward or criminally inclined. It is surprising to what extent that idea still persists, and it is only gradually that we are replacing this with the true idea that Canada is a wonderful land of opportunity, and that British boys and British girls in general are welcome here and that in this country they may build for themselves a future not possible in the old world."

"The juveniles movement has become very popular and the prospects for next season are exceedingly promising," stated Mr. Pym.

Sheep and Lamb Fair

Manitoba Sheep Breeders To Hold Annual Show At Brandon

Preparing for a sheep and lamb fair this autumn that will be even larger than a year ago, the directors of the Manitoba Sheep Breeders' Association have fixed October 30 and 31 for the annual show. As usual, the fair is to be held in the Winter Fair Arena, at Brandon, and on a scale that will attract wide attention. A year ago there were 600 lambs entered in the show which is fast reaching record proportions, and the directors anticipate a larger entry this year because of more favorable conditions. The recent movement in the province to place sheep on Manitoba farms is expected to lend considerable interest to the Brandon show.

It is stated that women barbers are driving many men out of the business. He clips, she clips, ellipse.

Illustration Stations Supply Grain Seed

Becoming Very Valuable As Distributors Of Better Quality Of Seed

Marquis holds a leading position in the varieties of wheat grown in the provinces of Manitoba, Saskatchewan, and Alberta. According to the chief supervisor of the Federal Illustration Stations, more than seventy-five per cent. of the sales of seed wheat made by the illustration stations last year were of the Marquis variety. In his report for last year, published by the Department of Agriculture, at Ottawa, Garnet was most in demand in the northerly districts of all three provinces. Of the oat varieties Banner and Victory in all the provinces found preference excepting in Northern Ontario. Northern Quebec, and sections of the Maritime Provinces subject to early frost, where the Alaska variety has proved a very desirable oat. Of the barley varieties O.A.C. No. 21, Trebi, and Charlottetown, No. 80, have done well on the illustration stations. The choice of the variety, however, depends largely on the soil and climatic conditions of the district. Trebi barley does particularly well on the Manitoba stations. From the crops of the past year grown on illustration stations, 40,072 bushels of seed grain, 7,999 bushels of seed potatoes, and 18,061 pounds of grass and clover seed were sold. The illustration stations, using as they do, only the choicest varieties of farm crops, are becoming very valuable distributors of the better varieties of grain, potatoes, and grass seeds.

YOUTHFUL COTTON PRINT

All the smart young folk are making their morning and sports frocks of cotton fabrics, because they are so easily made, and the cost a mere trifle. Take the model illustrated in red and white printed pique with vivid plain red bias binding emphasizing scalloped outline of side closing bodice, and edge of kimono sleeves. Why it is made in less than two hours! Only a few seams to join! Style No. 555 comes in sizes 14, 16, 18 and 20 years. Made in plain white pique for tennis. It will appear quite different. Peach shantung, gingham check in orchid and white, yellow sportswear, linen, orange silk crepe, capucine tones in printed lawn, voile in pink check in green and white, and white angora wool jersey are stunning ideas. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Science in the Dairy

Milk Can Be Cooled and Pasteurized In Same Tank

It is now possible for milk to make the entire journey from cow to consumer without contact with the air, until opened for use. Grandpa wouldn't have believed it, and if he had, he would have said it was silly. In his day, cows were milked in an open bucket, by hand, while flies, dust, and millions of bacteria swarmed over the pail. It was grandpa's idea that thunder made milk sour, and as far as he was concerned, or even interested, the bacterial count per cubic centimeter was a lot of apoplexy.

A modern generation thinks differently and barnyard milking has given place to dairy science. Now comes R. H. Graves, who is in charge of dairy cattle feeding, breeding and management of investigations for the bureau of dairy industry, United States Department of Agriculture, with an idea that may set a new pinnacle of dairy sanitation.

Installed on the Beltsville, Md., experimental farm, his method consists of overhead sanitary pipelines that carry milk direct from the cow to the large vacuum tanks in the dairy house. It can be cooled as it enters the tank, or it can be pasteurized and then cooled in the same tank. It is possible, he says, to go a step further and bottle the milk under vacuum, using the principles now commonly employed in canning fruit and vegetables.

The system consists of a mechanical milking unit of standard make, but instead of going into the usual portable receptacle, the milk is drawn into a stationary container located between two stalls and somewhat above the cows. The receptacle is of unbreakable glass and is suspended from a weighing mechanism. Its transparency makes the rate of milking visible to the operator at all times, but by the amount of milk produced under the new system, shows that after pasteurization and cooling, the average count for four days was only fifty-five per cubic centimeter. The system not only gives a cleaner product, Graves says, but reduces the labor and the costs incidental to milking.

He Did Not Wait

A railway bridge had been destroyed by fire, and it was necessary to replace it. The bridge engineer and his staff were ordered in haste to the place. Two days later came the superintendent of the division.

Alighting from his private car, he encountered an old master bridge builder. "Bill," said the superintendent anxiously, "I want this job rushed. Every hour's delay costs the company money. Have you got the engineer's plan for the new bridge?"

"I don't know," said the bridge builder, "whether the engineer has the picture drawn yet or not, but the bridge is up and the trains are passing over it."

Seals found along the coast of Labrador are hunted, not for their fur, but for leather and fat.

PROMOTED

H. C. P. CRESSWELL

Superintendent, Department of Colonization and Development, Canadian Pacific Railway, Montreal, who has been appointed Assistant European Colonization Manager of the Department with headquarters at London, England.

The Combine Harvester

No Reason Why Combine Cut Grain Should Not Grade As High As Grain Cut By Blade

About 600 cars of average grain crop may be harvested in a season by the modern combine reaper-thresher having a width of cut of 15 or 16 feet. On the same basis a machine cutting a 100 foot swath would handle about 400 acres. These figures have been arrived at in seven years' experience with the combine reaper-thresher at the Swift Current, Saskatchewan, experimental station.

The results of this experience with work done not only on the station, but on many farms throughout the province, are presented in Bulletin No. 118, of the Department of Agriculture, at Ottawa. Most of the combines included in this study threshed the wheat as it was cut, while others were equipped with a windrow harvester and pickup. In using the combine it is shown that caution must be observed in the date of commencing its use and proper recognition must be taken of the effect of even light showers, dews, and white frost on standing grain. When all these precautions are intelligently observed, the officials of the stations, who have been studying the question, feel that there is no good reason why combine cut grain should grade lower than blinder harvested grain. Practically all cases of toughness and dampness arising from the use of the combine are believed to be due either to a too early start, or to harvesting early in the day following a night of dew or white frost.

Women Explorers

Three young women, Baroness Christa von Bradenstein, Miss Nedda de Namur, and Miss Margaret d'Angelo, recently set out from New York to explore Alaska, the Gobi Desert, and the wilds of Australia. Loaded in the back of their car they had a tent, three army cots, a motion picture camera, an ordinary camera, a typewriter, a camp stove, and a German shepherd dog.

Mrs. Soop: My husband has left me. He ran away with our maid.
Mrs. Sudds: How terrible! Isn't it?
It is so hard to find servants now.

There are 7,000 miles of water-mains in London.

Winston in the West

Rt. Hon. Winston Churchill who is touring Canada, over Canadian Pacific lines, inspected oil developments in Alberta and is here seen looking at the frost-covered pipes that convey the oil from the Home Wells, in the Turner Valley to the separators. He was accompanied by his brother, Major Churchill, and his son Rudolph. Inset shows, Mayor Osborne, of Calgary, and Mr. Churchill leaving for the oil fields.

Various Live Stock Organizations Are Being Called Upon For Increased and Better Production

Value Of Research Work

Once Destructive Agent Now Used As A Fertilizer

The feat of making two blades of grass grow where one grew before has been excelled by researches conducted at the smelter, at Trail, B.C. Hitherto the sulphur dioxide fumes, highly destructive of vegetation, have made the districts about such works a wilderness. Lawnsuits were the only productive crops on the farms roundabout, and the company had to pay large sums in damages to the farmers. Similar trouble was experienced in the neighborhood of the nickel smelters in the Sudbury district.

Chemists were put to work to find a remedy. They have not only done this, but have discovered an unexpected value in the baleful fumes. A process has been evolved whereby what was once a destructive agent can be utilized in the manufacture of a fertilizer for which there is said to be an unlimited market on the prairies.

The announcement of the discovery includes a statement that a plant to cost seven or eight million dollars, will be built at Trail for the manufacture of this chemical fertilizer. It will call for large additional electrical development, so that business generally will be stimulated.

The incident illustrates the far-reaching value of chemical research. It vindicates the expenditures which Ontario and the Dominion have undertaken in this direction.—Toronto Telegram.

Portable Hog Cabins

Small, Movable Cabins Will Be Found Of Great Advantage

While a substantial hog pen is necessary on a farm where pigs are raised to any extent, it is of great advantage to make use of small movable cabins, particularly for housing brood sows under winter conditions of under summer conditions when the pasture is small. The cabins are also useful as a shelter for growing pigs in summer when on dry lots or pasture. The Dominion Animal Husbandman, in his report for 1928, published by the Department of Agriculture, at Ottawa, recommends a cabin with a floor area of fifty square feet. A cabin of this size will comfortably house five adult brood sows when fed outside and given the run of the yard. Such a structure has been found at the experimental farms to be inexpensive and in many instances may be constructed from material which is found on the farm. The A-shaped cabin popular some years ago, has lost favour at the experimental farms, as the sloping roof is apt to be broken away by the hogs when crowding inside. The walls should be perpendicular for three or four feet with a ridged roof above.

Flour Exports

Greatest Volume Of Flour From Canada Last Year Went To China

Canada shipped wheat flour directly to 83 countries during the last crop year, ending July 31st, and wheat to 34 countries. A return of the Dominion Bureau of Statistics covering this period showed exports of wheat to all destinations at 354,424,699 bushels, and of wheat flour at 11,808,775 barrels. The greatest volume of flour exported from Canada in the last crop year went to China, with the United Kingdom second, and Germany third. Shipments to China amounted to 3,940,667 barrels; those to the United Kingdom 2,637,867 barrels and to Germany 1,097,259 barrels.

Scrapping Old Ideas

New factory methods, new selling methods, new ideas, new machinery—these are vital requisites for the post-war era. In a new trade you get them more easily than in an old one. That is why cotton pines and artificial silk flourishes: It is not by lock-outs that Lancashire can hope to be saved, but by clean-outs—of old ideas, old methods, old machinery, old salesmanship, and above all, dead capital. The North can flourish again—on right lines.—London Daily Chronicle.

In Australia there are at least 20 species of animals that are aviators—flying squirrels, flying possums, flying mice and even flying bears.

Chronic borrowers are more or less touchy.

Every exhibition and various live stock organizations receiving federal government aid are being called upon to boost for increased and better production. Hon. W. E. Motherwell, Minister of Agriculture, sounded that note at the National Exhibition in Toronto, and it will be repeated from one end of Canada to the other.

The Department of Agriculture is convinced that Canadians have mighty appetites, and as a result, they are eating much of the produce that used to go for export. In the face of an increase of 148,000,000 dozen eggs per annum last year, over the total of 1920, Canadians consumed so many that there was scarcely enough left for export to balance the eggs imported during the winter months. Accordingly Canada is now practically off the map as an egg exporting country. Canadians per capita have a considerable lead over any other people in the world in the consumption of eggs.

The situation with regard to butter is practically the same. It is claimed that in proportion to its population, Canada beats the rest of the world in the amount of butter it uses. So in spite of a steady increase in production there is no butter to export. Poultry and lamb are also in the class of products which Canada grows great quantities and now consumes all.

Canada's exports of bacon are falling off at the rate of about 30,000,000 pounds a year. If it keeps up in two years she will be off the export market although the hog population is greater than it was ten years ago.

The Department of Agriculture is accordingly trying to step-up production in the above commodities. It is urged that there is a time of big production in every other line of activity. Farmers and their families want more than they used to expect in the way of luxuries, and the farmer to pay for these must produce on a greater scale than when his wants were modest.

Many reasons are given for the increase in food consumption by the people of this country. It is claimed to be increasing faster than the growth in population. The great influx of United States tourists is given as one reason. Another is the development of outside or semi-outside occupations such as the paper mills and the mining industry, where workmen as a rule eat more than at inside jobs. Then Canadians are a busy people and busy people, Mr. Motherwell says in an interview recently, eat more than loafers.

Importation Prohibited

Ban Is Placed On Cattle From Scotland, Owing To Outbreak Of Foot and Mouth Disease

A ministerial order signed by J. H. Girdale, Federal Deputy Minister of Agriculture, cancels all permits for the importation of cattle, sheep, goats and other ruminants and swine from Scotland to Canada. The only exceptions to this order are those already embarked on vessels en route to the Dominion. The order is under the provisions of the Contagious Diseases Act, and is made on account of an outbreak in Lanarkshire, Scotland, of foot and mouth disease. Similar restrictions are in effect regarding shipments of these animals from England.

Winnipeg Grain Exchange

Membership in the Winnipeg Grain Exchange has been raised to \$50,000. A resolution that the cost of membership be raised to this figure was carried unanimously at a meeting of the Grain Exchange on August 27th. The last membership was sold for \$28,700.

Old Maid: "To think of so many million youths saying 'Yes,' and one would be enough for me."—Il Travaso, Rome.

Advertising Is News ..

Many merchants believe that newspaper advertising is nothing more than an appeal for trade. Newspaper advertisements are an appeal for trade of course, but they are also something more—they are news.

And important news too. To the mother who has to buy shoes and a suit for Johnny, to say nothing of her other many requirements, the announcement of a new and better style, a lower price or an improvement of any kind is read with as much interest—and more—as the proceedings of Parliament.

The peoples' money and the goods they have to buy are two vital factors in their lives. Factors in which they are always keenly interested—therefore, does it not seem reasonable that an advertisement dealing with these things would be read with interest by them.

*Yes, advertising is news and the public demands news—and there is little to choose as regards importance between news pertaining to their pocket books and news pertaining to their social system.

To the merchant who catches a vision of the real meaning of advertising—there opens up an avenue for Service and Profit, which has hitherto remained closed.

An Indian grave, discovered by accident by Canadian Pacific employees at work near Brooks, Alberta, last May, is considered by experts to be between 300 and 400 years old. It is thought the grave was originally above ground but the passage of centuries had buried the grave below the soil. An irrigation ditch was being constructed when the grave was discovered.

Tri-motored airplanes are being launched in one of the most spectacular fights in the history of aviation. War has been declared by the Canadian Government on the spruce bud worm and the airplane is to be the principal arm of the service. Planes each carry 1,500 pounds of powder, and will dust it while flying low, over the tree tops.

The blueberry industry is showing much improvement in Yarmouth and Shelburne counties, Nova Scotia. Last year there were only 4,000 acres of croch land burned for blueberry growing; this year 10,000 acres have been burned. Value of crop last year was \$55,000 and it is estimated that the crop's value could be increased to half a million dollars.

The province of Alberta has adopted Old Age Pensions, the funds for which are provided by co-operation between the federal and provincial governments. The scheme has now been adopted by all Canadian provinces from the Quebec boundary westward.

Though crops in several parts of Western Canada would be benefited by rains, crop outlook on the whole is very promising. Reports from all parts of Saskatchewan are generally encouraging. The Alberta report is good, especially the Peace River country where present prospects indicate one of the best crops on record. About 25,000,000 acres are sown to wheat in Canada this year. Last year the Dominion harvested over 535,000,000 bushels of wheat, the largest crop in the country's history.

The fourth annual midsummer gathering of the Swedish-Canadian League held a two-day convention at Lac du Bonet, Manitoba, recently and decided to build a home for Old Swedish folk at Winnipeg. Another feature of the gathering was a pageant of old Swedish folk-dancing and songs presented in old-time costume. Many of the dancers were the same who appeared at the Regina festival held earlier in the year at the Saskatchewan hotel in that city.

A list of extraordinary accidents has recently been published concerning motorists at level crossings and included the following:—One driver drove car on tracks and went to sleep. 44 motorists drove into the sides of moving trains. 33 drove into the sides of standstill trains. One killed himself while driving between railway cars while they were switching. Seven went for a drive along the tracks and lost their cars. One driver turned his car on the tracks while he went to search for something he had dropped on the road; when he turned there was nothing left of his car. These found out too late that their habits needed retelling.

Dock dues on parcels from Cherbourg are now lifted under an order from the French Government and there will be consequently a great increase in despatch of these parcels from France to Canada, according to word recently received by the Canadian Pacific Express Company. Prior to this, parcels from France had to be shipped from Southampton causing a loss of a couple of days' time in reaching Canada.

Loans to harbor boards totalling nearly \$20,000,000 to be spent on programmes of extension and development have been approved by the House of Commons. Of this amount, ten millions each goes to Montreal and Vancouver, \$5,000,000 for Halifax, and balance for Three Rivers and Chicoutimi, Quebec.

The average cash income per farm house in the Prairie Provinces was \$254, exclusive of the value of seed, feed, meat, vegetables and other commodities produced and retained by the farmer for his own use, according to the New West Farmer, Canadian farm journal published at Winnipeg.

The younger generation, we are often told, is apt to be left to find its own way around these days, but not quite to the extent of the woman who left her 7-months old baby asleep in the Windsor Street Station, Montreal, while she went shopping in the city. It was taken to the ladies' waiting room and cared for. Several hours later the mother returned and was told of its whereabouts. It was still sleeping and she decided to have her supper before she "disturbed" it.

Wheat from the Prairie Provinces of Canada is the finest received in Germany from any country in the world, according to Johann Lange, one of the seven German millers making a tour of the North American wheat-growing and milling centres. "Canadian mills are second to none, if mills visited to Winnipeg may be accepted to be representative of Canadian plants," said Mr. Lange. "In operation cleanliness and the beauty of the flour turned out so far have not anything better since we arrived on this continent."

Letters to the Editor

Dear Mr. Editor:

Through the courtesy of your pages the British Welcome and Welfare League, Toronto, would like to broadcast a message to every Britisher in Canada.

Since 1907 our institution has been carrying on a great work—extending to deserving settlers from the British Isles, a hearty welcome, temporary accommodation, and rendering such other help and advice as will enable them to become worthy citizens of Canada.

The League is a public, patriotic, philanthropic organization, carried on by public-spirited citizens, aided in a small degree by municipal, provincial and dominion authorities, but in the main dependent upon public subscriptions for its maintenance.

In a few weeks our financial year will close, and we must set out to raise \$13,000 to carry on for the coming year. May we appeal most earnestly to all Britishers, particularly those hundred thousand newcomers who have been offered a welcome at our hands, to rally to our aid at this time.

Funds are urgently needed. From \$100 to \$1000, subscriptions will be most gratefully received, and will be formally acknowledged by our treasurer.

Yours cordially,

ALBERT CHAMBELAIN,

President,
British Welcome and Welfare League,
Toronto, Corner Gerrard and Pen-
brooke Sts., Toronto.

Household Hints

RECIPES

Walnut Torte.—3/4 lb. powdered sugar, 1 egg, 2 ozs. flour (about 3/4 cup), 1 oz. chopped walnuts, 1-2 tspn baking powder, 1 lemon rind. Bake in moderate oven. Cut in squares. Serve as dessert with whipped cream and chopped walnuts.

Orange Pie.—1 cup sugar, 1-4 (3/4) cup, 1 cup orange juice, 2 tablespoons butter, 1-3 cup flour, grated rind 1 orange, juice of 1-2 lemon, 3 egg yolks. Mix sugar, flour, salt and grated rind; add fruit juice and cook in double boiler 10 minutes, stirring until thickened, and afterwards occasionally. Add butter and egg yolks beaten light; cook two minutes, and cool. Put in baked pastry crust. Cover with meringue or whipped cream and bake in moderate oven until delicately brown. If meringue is used, marshmallows add a nice touch.

A Good Dessert for Wash Day.—This is good made the day before and set aside in a cold place. Take 2 cups stewed rhubarb, blueberries, raspberries or strawberries; then stir in 1-2 cup fine bread crumbs, 6 tablespoons sugar, 2 well-beaten eggs, pinch of salt, and serve with plain or whipped cream, when cold. We often have this on Sunday or wash day, and some times I make it in individual moulds.

Cocoanut Lemon Patties.—Take a piece of butter about the size of a duck egg and melt, then stir in enough cocoanut to make a stiff batter. Beat 1 egg and add enough milk to make 1-2 cupful; add to the cocoanut and butter; then enough sugar to suit taste, according to whether the cocoanut is sweetened or not, and a little lemon juice. Put a little of the mixture into pastry lined patty tins and bake.

Lemon Sponge Pudding.—One cup sugar, 2 tablespoons flour, grated rind and juice of 1 lemon, whites of two eggs, 1 tablespoon butter, yolks of 2 eggs, 1 cup milk. Cream the butter and sugar, add flour, mix well, add the beaten yolks of eggs, lemon, milk, then the stiffly beaten whites. Pour in a buttered baking dish. Bake slowly until set, about 1-2 an hour. This is a very delicious pudding. Fruit and whipped cream may be added, if desired. Will serve five people.

Fruit Custard Pie.—Line a pie plate with pie crust. Put in three halved fresh peaches and cover with a good custard to which vanilla and nutmeg has been added. Put in oven and bake. Almost any fruit can be used for this pie, such as peaches, pears, apricots, plums, grapes, apples, berries, or any kind of dried fruit. The dried fruit must be soaked, and cooked first before added to pie.

Coffee Cream Pie.—1 cup milk, 1 cup coffee, 1-4 cup sugar, 2 tablespoons cornstarch, 2 eggs. Bring milk and coffee just to boiling point, then pour over the egg yolks that have been well beaten with the sugar. Return to the fire (in a double boiler) and add the cornstarch moistened with a little cold milk. Stir constantly till the mixture thickens, and coats the spoon. Cook one minute, then remove, and when nearly cooled, turn into a baked pie shell. Cover the top with the meringue which is mixed on with a pastry tube, if you have one, and return to the oven for a minute to color the meringue. This pie is just wonderful and is nice with whipped cream.

A Hotel in Diamonds

Like a story from the Arabian Nights is the description of the miniature model of the Royal York Hotel, shown at the Toronto Exhibition this fall. The model is valued at over \$300,000 and in its construction there were utilized more than 15,000 Ellis faultless quality diamonds. They were mounted on a framework composed of satin wood covered with the finest wax. The miniature was drawn true to scale and measured 16 inches high by 12 inches broad. Reflected from thousands of facets, the brilliant display of light, broken into all the colors of the spectrum, made this exhibit one of the most visited and most talked of at the big Fall Fair.

Dealing With Confidence

Farmers, both shareholders and non-shareholders, deal with confidence with this farmers' company.

VIKING

The annual rally day exercises in connection with the United Sunday school were held in the new Community hall last Sunday afternoon. The hall was comfortably filled with pupils, parents, teachers, and others interested in the work of the Sunday school.

The Sunday school orchestra under the leadership of Mr. Basil Hilliker gave some very excellent selections prior to the opening of the exercises by Rev. Mr. Bainbridge.

The Rally Day service program as outlined by the Dominion Religious educational council was followed which consisted of responsive readings, scripture lesson, hymns and prayers.

An address was given by Mr. Purvis entitled "In Quest of Others" in which he outlined the work done by the local United Sunday school since its beginning some twenty years ago, its growth and influence for good in the community. He also touched upon world conditions as now existing since the great war, and commented upon the Christian ideals that the leading statesmen of the world were advocating to promote peace and happiness among nations. It was a well thought out address that left no doubt in the minds of his hearers that the influence of Sunday school teaching upon young minds finds expression in later years when Sunday school pupils become leaders in world thought and affairs.

The promotion exercises in connection with the program when pupils were advanced from the beginners' classes on up to the intermediate grades, were very impressive, and revealed the fact that the Sunday school was graded and the work carried on in a well regulated manner.

Although the leaders and teachers in Sunday School work may sometimes feel that their work is not fully appreciated, the satisfaction of knowing that under their care the pupils are each Sunday growing in knowledge and wisdom of the Great Teacher Himself, is ample reward, and Rally Day affords an outstanding opportunity each year to present to the general public the really great importance attached to Sunday school work.

That the Viking movies are proving more popular each week with the public is shown by the increase in attendance at every performance. Besides furnishing a good program of pictures, Messrs. McElduff & Collins, proprietors, add much to the enjoyment with their music. Incidentally they also believe in informing the public through the medium of the press what is in store for them each week, and by following the News' columns each week you will know what's what at the movies.

J. M. Brydges, of Edmonton, formerly of the bank staff here is down enjoying his annual shoot. Although the ducks are scarce and wild Brydges is bagging a goodly share of them and will have a feed or two when he gets home; also a few stories to tell the boys of the good time that was had by all in the attempt to get the ducks.

Mr. W. H. G. Sinclair, of the General Steel Wares, Ltd., Edmonton, accompanied by Mrs. Sinclair and little daughter Marjorie are motoring to Viking on Saturday of this week and will be guests at the home of the former's sister, Mrs. Chan Collins, Second Avenue, over the week end.

H. W. Love, of Irma, was in town on Monday delivering some honey to local merchants. Mr. Love extracts and packs several thousand pounds of honey gathered by bees in the Irma district every year and the industry is growing and proving more successful each year.

While Mr. and Mrs. August Fors were visiting with friends near Cold Lake last week, Mrs. Fors was taken very suddenly ill and small hopes were held out for her recovery, but we are pleased to report that she is now improving and expects to be removed to the local hospital in a few days.

Mrs. Chan Collins was again hostess on Tuesday afternoon of this week at her home on Second Avenue, and again in the evening, being assisted in serving in the afternoon by Mrs. Herbert Collier, and in the evening by Miss Lenora Taylor.

Mike Johnson and daughter Miss Bertha and son John, motored to Calgary on Sunday. Herman Johnson and John Hefso have entered the Technical School in that city and are registered for the electrical engineering course for two years.

A prairie fire raged northwest of town on Monday and a call for help was sent to town to assist in putting it out.

The Independent Garage has been treating the car of J. J. Zucco under the careful eye of Ole Ohman, which adds to the comfort and appearance of the building in general.

Mrs. Kastor and Mrs. Cartwright motored to Edmonton the first of the week.

WORLD HAPPENINGS BRIEFLY TOLD

New Zealand will appoint a trade representative in Canada, it has been announced. Growing commerce between the two countries is given as the reason.

The amphiplane Bremen, first to cross the North Atlantic from east to west, is to be placed on permanent exhibition at the Museum of Poetical Arts, in New York.

A young peach tree bearing a fruit, half of which was a peach, and the other half a nectarine, was exhibited at the recent show of the Royal Horticultural Society in London, England.

Exports of Canadian wheat during the month of August totalled 10,106,266 bushels with a valuation of \$14,397,493, according to returns compiled by the Dominion Bureau of Statistics.

The R-100, British dirigible now under construction at Cardington, England, which was expected to make a trans-Atlantic flight to Montreal this fall, will not do so until next May, according to officials of the Department of National Defence.

Hon. Dr. Robert George Brett, pioneer medical practitioner in Alberta and one of the most outstanding public men in the province, died recently in Calgary, at the age of 73, after an illness extending over several weeks.

Lord Ypres, son of the late Field Marshal, plans to leave for the United States shortly to exhibit his paintings. Lord Ypres paints his pictures in a studio built in the garden of his home, Ivy House, built during the reign of William III.

Premier Mackenzie King proposes to make a trip, probably to the Pacific Coast, starting about the end of October. It will be a somewhat hurried trip, the prime minister said, but he will make a number of speeches, some of them, in all probability, on the way out to the west.

French Bakers Celebrate

Commemorated Four Hundredth Birthday of the Doughnut

This generation has an evident fondness for anniversaries. People like them, and seek causes for holding them. Therefore, no person can object when French bakers decide to commemorate the 400th birthday of the doughnut.

The first example of the famous comestible was made in Paris in 1529. Some time later it got passage over the Channel into England, and from there made its way with household effects and other ideas to this continent.

The first doughnut we read in the Christian Science Monitor, was shaped like a crescent. That is, of course, interesting, but is of comparatively little importance. The real thrill will come with the name of the genius who first took a hee and moulded the doughnut round the vacant space.

Promoting Trade Welfare

Six Apprentice Grocers From Great Britain Now Touring Canada

So that they may know better the Canadian goods they will hand over the counters in their shops in England, and to promote the welfare of trade between the mother country and the Dominion, six apprentice grocers from Great Britain are now touring Canada, under the auspices of the Department of Trade and Commerce, with the co-operation of the Canadian National Railways. They were selected for the tour by an essay competition conducted by the British Institute of Certified Grocers for the Department of Trade and Commerce.

Clue To Unsolved Mystery

McMillan Expedition Finds Traces Of Frobenius Party, Lost In 1576

A clue to an unsolved mystery of nearly 400 years' standing—the fate of five men left on Kadlunian Island by Sir Martin Frobenius in 1576—is reported by Donald B. MacMillan, on his return here from over two months' exploration voyage to Baffin Land.

On an island on Countess Warwick Sound, the famous explorer discovered an ancient stone house which the Eskimos said was the work of white men. Inside were the bones of a bear and other evidence that it had been used as a shelter. The age of the moss and other particulars pointed to the dwelling being contemporary with Frobenius.

Kadlunian was also visited and there the party found, in a very fair state of preservation, the house built by Frobenius in Queen Elizabeth's day. Digging in—the earth floor, they discovered some pottery and other relics belonging to that period; also traces of the ship-ways down which the intrepid explorers launched the boats they built after their ships were crushed in ice.

It was hitherto supposed that the five men left behind by Frobenius on one of his three voyages made attempts to build a fort to protect the supposed gold mines and had been killed by Eskimos. Careful enquiry among the natives reveals a tradition that the white men were not slain, but built a big boat and set out on their perilous return to England.

The relics now found by MacMillan indicate that they had proceeded only about fifty miles when their frail craft was crushed by icebergs, and one or more escaped ashore and built the shelter in Countess Warwick Sound.

Winnipeg Newspaper Union

UNUSUALLY LOVELY

A charming tub silk in gay print in red and white coloring, so important for summer wardrobe. Its practicality and sportive-air carries one through an entire day. It can be worn to town for shopping, or to the office, and then to keep luncheon engagement at any fashionable restaurant. It is suitable for Country Club, for the beach or week-end party. Style No. 563 with its graceful flaring skirt with soft gathered fullness creating a cascading draped effect at side, and slightly bloused surplus closing bodice, is most fascinating, made of flowered chiffon for afternoon. It may be made with the long sleeves or with the sleeves omitted. It is designed in sizes 16, 18 and 20 years, 36, 38, 40 and 42 inches bust. Printed cotton voile, printed lawn, sheer pastel linen, printed rayon and georgette crepe, other attractive fabrics. Pattern No. 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Three Year Old Makes Long Journey

Little Boy Travels Alone From Liverpool To The Pas, Man.

Albert Pilkington, aged three years, stepped off the Continental Limited in Winnipeg recently, clutching in one hand a ticket that was taller than Albert by many inches, and in the other "Bosco," a mechanical doll, who had accompanied him all the way from Liverpool. Albert, or Bert, as he insists on being called, was en route to The Pas, where his father sent him to be looked after by an aunt upon the death of his mother. He sailed on the S.S. Regatta, in charge of the captain of that ship, and at Montreal was turned over to the care of George Cosgrain, Canadian National Railways conductor, who looked after him on the journey from Montreal to Winnipeg.

When the Continental Limited reached Winnipeg, Albert gravely climbed down from the train, shook hands with his friend the conductor, smiled for the photographers, and announced that he wanted an automobile ride. Bert was promptly accommodated, and when he boarded the train for The Pas, on the last leg of his journey, he gave his opinion that "Bosco" were "very nice, and automobiles were even nicer, but what Bert liked best of all, was "riding on a train." This winter when Albert is in the North he will have the thrill of riding on a dog sled, but until that time the railways have a certain small and enthusiastic booster.

Survey Of Dairy Industry

Data On Dairy Cows In Saskatchewan. Soon To Be Available

Making Saskatoon his headquarters in his survey of dairy industry for the province of Saskatchewan, Dr. George Misner, of the Department of Agricultural Economics, at Cornell University, announced that the actual taking of records will be completed about the end of this month. Figures will then be available on dairy cows on about 550 farms in Saskatchewan. Particular care has been taken to secure a fair average of the herds.

Dr. Misner has been furnished with a staff of assistants in the survey work by the Department of Agriculture, at Regina. Although figures as to the cost of producing and distributing milk in Saskatchewan will be ready soon, Dr. Misner does not think this will exhaust the usefulness of the data gathered. He expects the department will have further work when this is completed. The survey is financed from the surplus of the Canada Wheat Board of 1920, which was set aside for agriculture research.

Painless and perfect in their action, Miller's Worm Powders are always a safe and reliable remedy for children who show symptoms of worms. These symptoms are easily recognized in a feverish restlessness, frequently ending in convulsions. A point of notable importance is that after Miller's Worm Powders have expelled the worms, the stomach and bowels are toned up into a very healthy condition.

Research Possibilities

By Dr. H. M. Tory, President National Research Council

No one can realize what may be before us. I saw a statement made by a distinguished professor of chemistry that if we could write down the formulae for all combinations possible from a molecule containing one hundred atoms, these formulae alone would fill all the pages of all the books in the world. He was giving that as an illustration of the wide open field that lies before the chemists of this country in developing its chemical industry. Fifty years ago, there was no such thing as a strictly chemical industry. Last year in Canada alone there were invested in chemical and allied industries \$750,000,000 worth of products, while in the United States the corresponding production amounted to approximately \$7,000,000,000.

James Fenimore Cooper could not write unless he was chewing gum drops, it is said.

Minard's Liniment—The King of Pains

DIRECTS PROPAGANDA

Women In Airplane Factories

Are More Adept At Finer Adjustments Than Men

Much of the most exacting work in the construction of an airplane is done by women workers. Builders have found that women are most adept at shaping and sewing the fabric covers of wings and making certain delicate adjustments on the wings and struts of airplanes. Also, they are often called upon to plan the decorations of the interiors of planes built on special orders.

Major Reuben H. Fleet, president of Fleet Aircraft, Inc., of Buffalo, has many women workers in his plant. "We find that women can do the complicated work of covering the wings and assembling ribs and fitting them more accurately and in less time than men," he said.

Recipes For This Week

(By Betty Barclay)

CAIROU MARMALADE

12 raw carrots.
4 cups sugar.
3 Sunkist lemons.
1 teaspoon ground cloves.
1 teaspoon ground cinnamon.
1 teaspoon ground allspice.
Grate carrots, add sugar and let stand one hour. Add lemon juice and spices. Cook slowly for one hour. Turn into sterilized jars and seal when cold.

SEEDLESS BLACKBERRY JAM

The seeds of blackberries are very objectionable to many, so it is well to get rid of them. Mash berries, cook in their own juice until thoroughly heated then remove seeds by pressing through a fine sieve. Measure pulp and liquid and allow one cup sugar for each pint. Add sugar to pulp and cook rapidly until thick, stirring frequently. Pack in clean, hot jars and seal.

Natural Gas Exploitation

Exploitation of the district along the South Saskatchewan River, in the neighborhood of Riverhurst, with a view to ascertaining the possibilities of natural gas is to be undertaken on a more extensive scale within the next few weeks, it is reported.

Served In Rebel Rebellion

Captain H. O. Gray, 74, for years a crack rifle shot on teams representing Canada, died in a hospital at Ottawa. He was a member of the Ottawa sharpshooters during the Rebel Rebellion in 1885. He was a member of the council of the Dominion of Canada Rifle Association.

The man who feels a small job beneath him is invariably too small for a bigger one.

Had Diarrhoea Bowels So Active Feared For His Life

Mrs. S. J. Jago—Canobie, N.B., writes: "My little boy, when three years old, had a severe attack of diarrhoea. The bowels were so active, and he vomited so much, I feared for his life. I was a mother of a sick child, and he was always getting worse. A friend told me of

and after the second dose I saw an improvement. I gave him almost a bottle and he was completely relieved.

"I have used it for the other children, and my husband and myself. My husband gives it great praise, and when he goes away from home to work he always takes a bottle with him."

Put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Only choice leaves grown at high altitudes go into the blending of Blue Ribbon Tea. That is why its flavour is so uniformly excellent. Insist upon getting it from your excellent tea dealer. Refuse substitutes of inferior quality.

Lure Of the Northland

Ottawa Deluged With Inquiries Regarding Port Churchill

The lure of the North is strong in the hearts of the Canadians. Any one doubting this should see the correspondence pouring in on the Department of Railways and Canals asking to be allowed to go to Churchill. The flood of requests started when a news item announced that it might be possible trains would be running by the end of the month.

Every one seems to be wanting to go North. The requests come from Boards of Trade wishing to send parties up there from Legislatures wanting representatives on the ground, big commercial interests desirous to be early on the scene and the great mass of individuals who want to grow up with the port. It is rather embarrassing to the department, because at present the only buildings at Churchill are those to house the men engaged on the dredging and the railway construction. The only food supplies, there are those belonging to the Government.

Hon. C. A. Dunning, Minister of Railways, announced—Sunday that his department was preparing a statement which will be published soon, explaining the whole situation there. During the summer the construction gangs have continuously been called upon to feed adventurous people who made their way by air or otherwise to Churchill without making any provision as to what they should eat after they got there. The Manitoba Government will have the job of supervising the building of the town. The Federal department is concerned only with the railway and the port improvements. It looks as if Churchill would be a Mecca for tourists from the start, and the first call will be for a hotel.

Juveniles To Compete

Boys' and Girls' Swine Clubs Membership Is Necessary

More than five thousand boys and girls on Canadian farms will be taking part in the annual swine club and calf breeding contests in the various provinces, this year, for which the Canadian National Railways offer prizes and trophies. It was stated recently by Dr. W. J. Black, Director of Colonization and Agriculture, of the National System. Through the stimulation of the assistance offered in this work by the railway company, in bringing the boys and girls together in annual competition; the work of the clubs has progressed rapidly, particularly with respect to calf clubs. There will be nearly 200 of these in operation this year, there being a 400 per cent increase over last year.

Barcelona Taxes Postage

Barcelona citizens have been subjected to various taxes to help defray the enormous expenses of the International Exposition. All letters posted in Barcelona must, in addition to the regular postage, bear an exhibition stamp of five centimos (about three-quarters of an American cent). A tax of 1000 centimos is levied for each long-distance call, and each telegram originating there.

Wheat Marketing Or Protein Basis

Dr. Robert Newton, professor of field crops, of the University of Alberta, has been asked by the National Research Council, of Canada, to make investigation of the possible reception which would be given in Europe to a system of marketing wheat on a basis of protein content. The report will be prepared for the next session of Parliament.

Minard's Liniment—Used for 50 years.

Huge Milk Shipment

Largest Consignment Of Its Kind Shipped From Aylmer To Western Canada

Seven hundred and fifty thousand cows working in high gear for one whole day could contribute just enough milk to make up a shipment which left Aylmer, Ont., on a special Canadian National Railways freight recently for the west. Product of an Aylmer Milk Evaporating Company, it was the largest shipment of its kind ever to leave any point in Canada, and made up a train consisting of 200 cars. There were 11,880 cases containing 700,000 cans and weighing 353 tons in the consignment which is destined to grace the tables of farm houses during coming season. It required 1,500,000 pounds of fresh milk to make up this shipment at the largest evaporated milk plant in Canada. The product has a value of \$65,000 and is pointed to as a sterling example of an extension of the dairying industry in Canada.

Although a small part of the shipment will reach the Pacific Coast, it is, in the biggest part, for consumption throughout the prairie provinces.

Take Pride In Canada

Only One Opportunity To Travel the Length of This Dominion To Stir Up Patriotism

Proud of being a Canadian before he took a recent trip to western Canada, Dr. C. B. Oliver, of Chatham, Ont., is even more proud of his nationality, since he has once more travelled through Manitoba, Saskatchewan, Alberta and British Columbia. The more he sees of the Dominion, the prouder he is of Canada. His patriotism needs no artificial stimulus. All he requires is to see his nation. Every citizen of this Canadian nation has a perfect right to be proud of his country. The more a person travels in Canada, the more he appreciates the wealth of this land; and the more the Canadian travels in other countries, the more he realizes that in Canada he can find facts and opportunities to equal anything he sees elsewhere.—Border Cities Staff.

It Has Many Qualities.—The man who possesses a bottle of Dr. Thomas' Electric Oil is armed against many ills. It will relieve a cough, break a cold, prevent sore throat; it will reduce the swelling from a sprain, relieve the most persistent sores, and will speedily heal cuts and contusions. "It is a medicine chest in itself."

Married women in Dallas, Texas, are not permitted to hold positions outside their homes, unless there are "especially mitigating circumstances."

It is estimated that about six or seven persons out of every million are struck by lightning.

Just place a glass or cup over the opening and the contents will keep perfectly. Eagle Brand has been the leading baby food since 1857.

The Singing Fool

By HUBERT DAIL

Copyright, 1923, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stone, a singing waiter at Blackie Joe's New York night club, was famed as a composer of popular songs. Grace, the cigarette girl at Blackie's, who loves Al without his knowing it, is left behind. He marries Molly Winton, a ballad singer, and makes her famous, too. She does not love him. Molly has a baby, Junior, whom Al adores. Al becomes part-owner of the fashionable Club Bombo, and on the night of the third anniversary of his marriage presents his beloved Molly with a diamond brooch. He does not know that Molly, while approaching the club in her limousine, was ardently kissed by his friend, John Perry, who begged her to leave Al. On the way home with Al she is sleeping. When she sees Al later in the nursery bending devotedly over sleeping Junior, his baby son, her conscience bothers her. This, in turn, makes her angry at her husband.

CHAPTER XIV.

"Al heard Molly's step and turned to embrace her. She dutifully avoided his grasp, stifling the look of aversion in her eyes as she did so. Al thought nothing of it; he believed she was merely anxious to avoid any noise that might wake Junior. Again he made a move as if to touch the child, but Molly caught his hand. "Sh!," she murmured in an irritated voice. "Don't wake him. I'm tired. He might cry."

Al pretended in earnest pantomime that he had no intention of waking Junior, but, unseen by Molly, his other hand crept toward the protruding toe of the boy. The truth was Al couldn't bear the thought of going to bed without a word or two with little Junior. So as Molly turned away to go to her own room Al nudged the baby's foot and smiled to himself. Junior's eyes opened sleepily and, as he recognized his father, he murmured, "Hello, daddy."

At the gentle words Molly turned, a smile stealing over her face. In spite of herself, there stood Al's pretended surprise that Junior had awakened, but—obviously delighted that it had happened. He quickly leaned over, gathered the baby in his arms and straightened up with the child held close to him. One chubby, soft arm went round his neck.

"Good boy, daddy," whispered Junior, snuggling closer. "Come home."

Swiftly Al carried his precious bundle toward Molly, who waited, a look of indecision upon her face. She wanted to see Junior and cuddle him, too; yet the sight of his innocent baby face, at this moment sharpened her guilty thoughts and aggravated her irritation toward Al. But Al was holding Junior toward her, so there was nothing to do but take the child in her arms.

"Be more careful," she whispered pettishly. "You're spoiling my orchids."

Al noticed her tone and quickly took Junior from her. But as soon as she had left the nursery and Junior sat down on his father's lap,

face; desperately she struggled to think of an explanation that would smooth things over. But it was no use; she had gone too far; there was no turning back.

"What is it, darling?" Al pleaded. "Can't you tell me? Haven't you everything to make you happy—a beautiful home—a baby—me?"

But Molly seemed to grow harder with every word he uttered. Her key silence, as she confronted him with gleaming eyes, sent a dreadful current of fear through him. Was there nothing he could say to arouse her to drive out this evil spirit and bring back the Molly he loved. He said with a controlled quietness that gave no hint of his madly throbbing heart:

"—Explain as though you didn't love me—any more. Don't you?"

At that Molly's head came up. It was as if she had been waiting, trying to force him to a show-down. Now she was ready to speak.

"I don't love you any more."

The dreadful words were spoken slowly and soberly, but the minute they were out a look of disdain curled her lips and her eyes flashed defiance. Now—at last—she had made clean. Now, her attitude said, what was he going to do about it?

Al recoiled as if she had struck him across the face with a whip. The words seemed to travel swiftly down interminable corridors in his brain, and came echoing back.

But finally Molly could stand the silence no longer.

"You heard me," she exclaimed harshly. "I mean it. I don't love you! Do you understand? I don't love you! Now let me alone!"

The last remark was shot at him with deadly aim and purpose, as she might have thrown a burning, blinding faggot. It was all over now, she thought; there would be no more pretending on her part. This was the climax of the storm that had been gathering force within her for more than a year. She didn't love him; in fact, she hated him now with a terrible intensity because he had made her feel unworthy by loving her too much. She wanted to hurt him with all the cruelty in her power, driving forever that adoring look from his eyes.

Al did not cringe as he listened to her, yet he knew at last that their life and comradeship, together with the happiness of his face, was pale as death. But as they faced each other, eyes agleam, hands clenched, they heard another sound like the faint sweet tinkle of a bell. It was Junior's voice, calling gently:

"Mamma. Please come to me!"

(To Be Continued.)

WHEN BABY IS WELL.

MOTHER IS HAPPY

The happy mother is the one whose baby is well—it is the laughing, gurgling baby who always brings joy to the home. When baby is ill everyone in the house suffers—not only through worry over the little one but through loss of sleep—no one can find rest with a sick baby in the home. Thousands of mothers are happy mothers because they have found the way to keep their little ones well—or if sickness does come on suddenly, as it usually does with little ones, they have found the way to speedily bring the baby back to health again.

Mrs. George Keck, Lindberg, Alta., is one of these mothers and she writes as follows: "I am the happy mother of a seventeen-month-old baby girl. Baby is healthy and strong and sleeps well at night. I give her no other medicine but Baby's Own Tablets, and she just loves them. I am never without the Tablets in the house."

Baby's Own Tablets are a mild but thorough laxative which regulate the bowels; sweeten the stomach and thus drive out constipation and indigestion and make the cutting of teeth easy. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Car Accidents in Iceland

Increasing Number Of Automobile Accidents Presents a Problem

Iceland, of all places under the sun, is complaining of its growing number of automobile accidents. Just like Chicago and New York and London, this metropolis has its careless drivers and its drunken drivers. And all of this, of course, makes for more accidents.

An auto has took a turn in a country road too rapidly. Two passengers were killed and the others injured. Icelandic authorities hailed the driver into court, found that he conducted his bus in a most careless manner and sentenced him to a month in jail. His license was taken away permanently.

But that corn with Minard's Liniment

"Ain't you going to get up and fight? I told you you've got him going."

"That's all right, you tell me when he's gone."

"Electric Man" Puzzles Doctors

Receives Shock When Using Telephone Or Radio Headphones

Frederick Stone, a chauffeur at Holworthy, north Devonshire, England, is so charged with electricity that:

(1) He cannot use a telephone or wear a radio headphone without receiving a shock, and

(2) He cannot drive his automobile or walk without wearing vulcanite insulation pads in his shoes, and

(3) He can locate buried gold, silver and copper.

This strange "electrical" man has spent 20 of his 49 years in hospitals puzzling doctors.

A phone test of his divining powers has been held at Plymouth Municipal Museum under the supervision of the curator. The electric man located without trouble buried nuggets of gold, gold-bearing quartz and even gold jewelry.

Stone had hidden gold and copper by means of a wand consisting of an ordinary steel coil spring. This twists and wriggles in his hand like a snake when he approaches buried treasure. The number of wriggles denoted the number of feet he was away from the exact spot.

Discussing his unusual gift, Stone said that these divining spells put a great strain upon him and were always followed by periods of intense lassitude.

"The only way I can get relief from the electric currents when I am thus overdone," he said, "is to touch wood."

"I enjoy listening to the wireless by loud speaker, but as soon as I put on a pair of headphones I feel physical helplessness as if I had received a blow on the head. I cannot use a telephone without intolerable discomfort."

"If once worn my wife's wrist watch and it came all to pieces. I must be supercharged with electricity."

Little Helps For This Week

"Watch therefore, for ye know not what hour your Lord doth come."—Matthew xxiv: 42.

Think not I dread to see my spirit through the dark gates of fell mortality.

Death has no terrors when the life is true: 'T is living ill that makes us fear to die.

—Omar Khayyam.

When the hour of death comes,—that comes to high and low alike,—then it's na what we have done for ourselves, but what we have done for others that we think on midst pleasantly.

—Sir Walter Scott.

When a man dies, they who survive him ask what property he has left behind. The angel who bends over the dying man asks what good deeds he has sent before him.

—The Koran.

Pity the Editor

A Difficult Matter To Be Popular With Everyone

It is likely editors are the most unpopular people in the world. If they try to please one group, they offend another. If they express honest convictions, which they usually do, narrow critics to the contrary notwithstanding they are by many misjudged and misrepresented.

If perchance, at rare intervals, an editor hears of no error that has crept in or feels no assault on his idea of what should or should not be published, he is profoundly relieved—almost happy. He does not need commendation for any meritorious thing he has written or done to make him measurably satisfied with life.

All he needs is freedom from the sharp stabs of those who are looking for imperfections or grounds for disagreement. There is no closed season, and often he is lambasted without knowing it, but if he doesn't know it, he is not hurt, and he may even imagine he has escaped by unanimous consent.

We would counsel the young who contemplate journalistic careers to develop thick and tough hides, as a preliminary step, and leave behind all desire to run for office, or to win in any other form of popularity contest.—Benson Munn, Monitor.

The Professor—After your motion for a new trial has been denied what is the next step to take?

The Pretty Girl Student—Td cry a little.

You can take lessons by mail to increase your will power or you can practice getting up at night for another blanket.

Dyeing this way makes faded Dresses NEW

DIAMOND DYES are the finest dyes you can buy. They are made to give you real service. They contain the very highest quality dyes that can be produced. It's the quality of the anilines in Diamond Dyes that give such soft, bright, new-looking colors; that make them go on so evenly—without spotting or streaking; that enable them to keep their depth and brilliance through wear and washings. Next time you have dying to do, try Diamond Dyes. See how easy and simple it is to use them. Then compare results. You will surely agree Diamond Dyes are better dyes. The white package of Diamond Dyes

is the highest quality dye, prepared for general use. It will dye or tint silk, wool, cotton, linen, rayon or any mixture of materials. The blue package is a special dye, for silk and wool only. With it you can dye your valuable articles of silk or wool with results equal to the finest professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package will dye every kind of goods, including silk and wool. Your dealer has both packages.

Diamond Dyes

Sun Proof
EASY TO USE—BETTER RESULTS

Diamond Dyes contain the highest quality anilines money can buy. And it is the anilines that count. They are the life of dyes; the source of their rich colors, brilliance and permanence.

Idea May Be Feasible

Berlin To New York In Six Hours Is Plan Of Young Engineer

"Take a solid breakfast in Berlin and don't worry about food on the plane. You can have lunch in New York."

This might be the last advice given by good friends to a passenger of a futuristic airplane not yet constructed, but planned by Heinz Guenther Perle, a 21-year-old Berlin engineer. Perle claims that his plane would make the trip from Berlin to New York in about six hours, saying that world-famous scientists and experts like Professor Einstein and Count Arco studied his device carefully, approved of it and now firmly believe in its feasibility.

"Table scraps can be converted into many useful things," advises a writer. For instance, if the scrap ends in tears, the little woman can convert it into a spring hat.

Bulwark Of Civilization

Sir Robt. Borden Says British Commonwealth Of Nations Is a Model

The British Commonwealth of Nations stands today as a model to the League of Nations. To destroy its unity would be a crime against mankind. So stated Right Hon. Sir Robert Borden, Canada's war-time prime minister, at a luncheon of the Canadian Club at Ottawa. Sir Robert was speaking on the occasion of the entertainment by the Canadian Club of the National Federation of Canadian University Students and other delegates to the second imperial conference of students, in session at Montreal. He chose for his subject, "A Vista in Political Evolution."

PATENTS

A 13c Or "Wanted Invention" and Information Sent Free On Request. The RAMSAY Co. Dept. 273 BANK ST. OTTAWA, Ont.

Packed full of fire for any sort of ignition job—farm engine, tractor, marine motor—Eveready Hot-Shots put the pep behind your cylinders!

Last longer because they recuperate marvellously. Protected by metal case against damp, rain or accident. Give full value for your money. Ask for Eveready Hot-Shots by name. If the label does not say "Eveready," it's not a genuine Hot-Shot.

When Pain Comes

What many people call indigestion is really excess acid in the stomach. The stomach nerves have been over-stimulated, and food acids. The corrective is an alkali, which neutralizes the acid instantly, keeps the stomach calm, and restores the balance. Phillips' Milk of Magnesia is the standard standard of physicians in the 50 years since its invention. One spoonful of this harmless,

tasteless alkali in water will neutralize instantly any excess acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

Quality Merchandise

STANFIELD'S MEN'S UNDERWEAR

"Known and Worn
from
Coast to Coast"

"RED LABEL"

The popular heavy rib for Men's Winter wear. Pure LAMBS Wool. Properly made and tailored throughout. They fit, they wash, they are warm and chill defying.

J. C. McFarland Co.

Irma Ladies' meet at the home of Mrs. E. Pease next Thursday afternoon.

Mr. and Mrs. J. U. Allen and Mrs. M. Chase, have been spending a few days in the City.

Mr. and Mrs. J. D. Whyte of Calgary are visiting with son Mr. Roy Whyte at the Irma Depot.

Mrs. T. Laycock of Hardisty is visiting with her grandson Mr. W. N. Frickleton.

Dan Matheson of Strawberry Plains has accepted a position in Wainwright.

The Irma Rebekah Lodge No. 87 purpose putting on a Whist Drive on Tuesday evening, October 22nd, also every 4th Tuesday in the month.

Mr. J. N. Fluwellling, his daughter Dorenia and son Gordon Consort visited at the homes of Mrs. M. A. Fluwellling and Mr. and Mrs. R. J. Tate.

Mr. Wendie Mitchell has accepted a position as teacher near Peace River and his brother Wayne is on a threshing outfit at Beaver Lodge in the Peace River District.

Mr. M. Ross has settled at Langley Prairie, B. C. for the winter. Milt left home with his auto about two weeks ago and decided to make a location in B. C. for the winter and we believe he has made a good location.

Mr. S. Burgarski, who has been barbering for Mr. J. Hedley left Tuesday for his home at Portland, Oregon where he intends spending the winter. Mr. Keeley of Edmonton is assisting in the barber shop.

Mr. Tom Askin spent the week end with his parents at Irma and with his brother Robert of Fort William who is visiting his parents. Tom is working for Gainer & Co. in Edmonton and appears to be enjoying city life.

Mrs. Maguire returned from Winnipeg on Friday night's flyer after attending the funeral of her sister, Mrs. Cheaters, who passed away in that city on Saturday the 21st of September. Mrs. Cheaters visited Irma a year ago and met quite a number of the Irma Ladies who will regret to hear of her sudden death.

Mr. George Hipperson and Mr. G. Smith of Edgerton, returned to Irma Wednesday night after motoring through a large part of the Peace River district. Both Mr. Hipperson and Mr. Smith are very enthusiastic about the vast area they covered and talk as if they might take up some of the cheap land in the new Great West. During their trip they encountered a heavy snow storm and had to ship their car part way to Edmonton by railway.

The drillers at McDonald No. 1 well Northwest of Irma have encountered considerable water but expect to be ready to set the 16in. casing at around 700 feet by the end of this week. This well is being drilled with standard tools and the hole is large enough to make a deep test if it is found advisable after testing the upper sands. We understand that Maple Leaf No. 2 has developed into a nice gas well. Some water was bothering when the well was first drilled in but the last reports we had were that the water had disappeared and the gas had become drier. We have had no word from Babylon Petroleum or any of the other wells that are nearing completion.

CHANCES WHERE YOU ARE

Many young and some older folks in this country and this town are looking around carefully for some place where there are chances to make good. Most all of them are overlooking the opportunities of the old home town. Indeed some never recognise the local chances until outsiders come in and take. They lay there for years until other folks with enterprise exploited the old home town's chances. Restless folks might or might not, of course, be interested in two rather sensible letters which Abraham Lincoln wrote. To a step-brother planning on selling out and moving from Illinois to Missouri, Lincoln sent this warning: "What can you do in Missouri better than you can here? Is the land any richer? Can you there, any more than here, raise corn and wheat and oats without work? Will anybody there, any more than here, do your work for you? If you intend to go to work, there is no better place than right where you are: If you do not, you cannot get along anywhere."

To a young law student who had written him for advice Lincoln wrote: "I didn't read law with anyone. Get the books and read and study them until you understand the principle features. It is of no consequence to be in a large town when you are reading. I read in New Salem, which never had more than three hundred people in it. The books and your capacity for understanding them are just the same in all places."

The New Triumph Marconi Batteryless Console

The performance of this new Marconi model sets a new high standard in the field of Batteryless Radio.

Powered with nine of the latest "AC" Radiotrons, it operates direct from the house-lighting current, furnishing the sensitive selectivity and tone brilliancy that will satisfy the most critical.

Built into its handsome two-tone matched walnut cabinet is a Superb Dynamic Speaker, assuring a smoothness and a fidelity of reproduction over the entire musical scale. Rattle or distortion is pleasingly absent from reception even when operated at room-filling volume.

Judged by any standard this new Triumph Marconi Batteryless is a Receiver the owner may well be proud of.

Complete with tubes \$268.00

Empire's Smallest Island Asks for Help

From King George and Queen Mary down to the lowliest of their subjects throughout the Empire, interest has been excited in the distant and isolated island when he sailed near the island and the inhabitants put off in boats and begged for wood and copper nails. Other gifts are books, magazines, clothing, gramophones and records and particularly a powerful radio set which will keep them in contact with the outside world. No ships can dock at the island and the Empress on her passage across the 3773 miles of ocean that separates Buenos Ayres and Cape Town will stop about half way within sight of the island and will raft to its inhabitants the gifts of the outside world. This will be done about the last week in February.

which are being sent on the recommendation of Captain S. Vint, old-time mariner who lives in Montreal and who recalls days when he sailed near the island and the inhabitants put off in boats and begged for wood and copper nails. Other gifts are books, magazines, clothing, gramophones and records and particularly a powerful radio set which will keep them in contact with the outside world. No ships can dock at the island and the Empress on her passage across the 3773 miles of ocean that separates Buenos Ayres and Cape Town will stop about half way within sight of the island and will raft to its inhabitants the gifts of the outside world. This will be done about the last week in February.

The people are self-governing and self-supporting. The men are daring seamen and clever carpenters and masons, but there is a touch of the primitive about the picturesque bullock-carts and the cottages built of huge blocks of stone. High cliffs circle the lonely island and are pierced with ravines, the walls rising like ramparts from the sea to a height of over 1,000 feet. They are topped by a central cone that stands out amid the surrounding cliffs at a height of 7,540 feet, snow-capped and symmetrical as the Peak of Tenerife. The island has only been in continual occupation since 1817, although discovered in 1506 by the Portuguese Admiral Da Cunha.

Climbs Mountain Named After Him

Rt. Hon. L. C. M. S. Amery, secretary for the Dominions in the late Baldwin Administration, who arrived in Canada recently on the Empress of Australia, had as his objective in this country the climbing of the 11,000-foot Mount Amery, named after him, in the Canadian Rockies. There is no official record of this mountain ever having been climbed before

this attempt which was undertaken with the famous Swiss guide Edward Feuz. Colonel Amery at once took the 2500-mile trip across Canada to Lake Louise whence in company of Feuz and A. O. Wheeler, honorary president of the Alpine Club of Canada, he set out for the peak located near the Great Columbia Icefields near the junction of the Alexandra and

Saskatchewan Rivers. Lay-Out shows (1) the vast rampart of Mount Amery with the great icefield below (2) Edward Feuz and (3) A. O. Wheeler (left) and Rt. Hon. L. C. M. S. Amery, chatting outside the Banff Springs Hotel just prior to setting out north with a pack train to locate and climb the peak.
